Professional Summary

Software Engineer with 10+ years of experience in web application development. Specialized in modern frontend frameworks like Vue.js, Nuxt.js, React.js, Tailwind CSS, and TypeScript. Also experienced with backend technologies such as Ruby on Rails and PHP. Adept at collaborating with cross-functional teams and delivering scalable, user-focused features that drive product impact.

Professional Experience

Frontend Engineer

PT Achilles Advanced Systems (Online Pajak) (September 2025 – Now)

OnlinePajak is an official DJP partner that provides digital solutions for managing tax administration and compliance.

- Designed and developed a reusable UI Design System for Vue.js using Vuetify and Tailwind CSS, as well as React.js components using Material UI, improving consistency and maintainability across applications.
- Contributed to the company's website rebranding, implementing the new visual identity and translating updated designs into scalable, reusable frontend components.

Frontend Engineer

PT. Bukalapak.com (October 2018 – March 2025)

Bukalapak is one of Indonesia's largest e-commerce platforms.

- Developed and maintained micro-frontends using Vue.js.
- Implemented key features such as aggregator delivery service (BukaSend) and enhancing user engagement.
- Integrated backend microservices using Ruby on Rails / PHP / Golang to optimize platform scalability.
- Collaborated with cross-functional teams to improve overall system performance and UI/UX.

Fullstack PHP Developer

PT. Toko Bagus (OLX Indonesia) (July 2016 – September 2018)

- Maintained and enhanced desktop/mobile platforms using custom PHP frameworks.
- Implemented new features to improve user interactions and site functionality.
- Optimized backend processes for faster loading times and better scalability.

Web Developer

PT. Pilar Timur Teknologi (December 2015 – June 2016)

- Led the development of Point of Sales (POS), Inventory, and HR Management modules for restaurant/café software.
- Designed comprehensive reporting and accounting systems to streamline operations.

Web Developer

PT. Asia Sarana Telekomunika (April 2015 – November 2015)

- Built ERP applications for lumber mills using PHP and CodeIgniter.
- Developed custom modules to optimize business operations.

Web Developer

PT. Madani Cipta Informasi (August 2012 – March 2015)

- Created applications such as Attendance Management System (AMS) and Document Management System (DMS).
- Utilized PHP (CodeIgniter) and MySQL stored procedures to build robust systems.

Web Developer

PT. Informatika Reka Mandiri (November 2011 – July 2012)

- Assigned to continuing a project investment application for ASABRI using PHP (CodeIgniter) and MySQL (Database) with frontend technology used JQuery, Bootstrap.

Education

Bachelor of Information Technology

STMIK LPKIA, Bandung (October 2007 – October 2011)

Technical Skills
